

Question # 10

 Revisit

Predict the output of the program.

startprogram

```
class sum {  
    public static void main(String[] args) {  
        int c = 0;  
        switch (c) {  
            case 0:  
                System.out.print("car ");  
            case 1:  
                System.out.print("book ");  
                break;  
            case 2:  
                System.out.print("pen ");  
                break;  
            default:  
                System.out.print("default ");  
        }  
    }  
}  
endprogram
```

Choose the best option

- ☒ car
- ☐ default
- ☐ car book
pen
- ☐ car book

Clear Response

Question # 9

Revisit

Which file contains Field value pair where values can be String , Integer , Float or Boolean.

Choose the best option

- ☒ YAML
- ☐ XML
- ☐ AML
- ☐ VPL

Clear Response

Question # 8

Revisit

Predict the output of the program.

startprogram

```
public class Program {  
    public static void main(String args[]) {  
        String Input = "Programming";  
        char c = Input.charAt(11);  
        System.out.println(c);  
    }  
}  
endprogram
```

Choose the best option

- ☒ g
- ☐ i
- ☐ Runtime error
- ☐ n

Clear Response

Section 1 of 1 Section #1

1 2 3 4 5 6 7 8 9 10 < 7 of 10 >

All

10

Question # 7

 Revisit

Predict the output of the program

startprogram

```
public class Z {  
    public static void main(String args[]) {  
        int a1[] = new int[10];  
        int a2[] = new int[] { 1, 2, 3, 4, 5 };  
        System.out.println(a1.length + " " + a2.length);  
    }  
}  
endprogram
```

Choose the best option

☐ 0 10☒ 10 5☐ 10 0☐ 5 10

Clear Response

Activate Windows

Question # 6

 Revisit

The USING clause is used when?

Choose the best option(s)

- ☒ You want to create a nonequijoin.
- ☐ The tables to be joined have multiple NULL columns.
- ☒ The tables to be joined have columns of the same name and different data types.
- ☐ The tables to be joined have columns with the same name and compatible data types.

Clear Response

Question # 5

 Revisit

_____ acts as a co-ordinator responsible for controlling and handling discussions in scrum?

Choose the best option

- ☐ Team Leader
- ☒ Scrum Master
- ☐ Project Manager
- ☐ Technology Lead

[Clear Response](#)

Question # 4

 Revisit

Which branch enables you to implement different Jenkinsfiles for different branches of the same project?

Choose the best option

- ☐ single branch
- ☒ Multibranch
- ☐ Environment variables
- ☐ Classic UI

[Clear Response](#)

Question # 3

Revisit

Which of the commands
is used to modify the structure of a table?

Choose the best option

- ☒ Alter table
- ☐ Modify table
- ☐ Change table
- ☐ Replace table

Clear Response

Activate Windows

Question # 2

 Revisit

Which statement is true
with respect to 'Merge' command?

Choose the best option

- ☐ Merge command performs insert
- ☐ Merge command performs update
- ☐ Merge command performs upsert
- ☒ Merge command replace the entire record set

[Clear Response](#)

Question # 1

Revisit

Which of the given phases consume more time during the Software life cycle

Choose the best option

- ☐ Analysis
- ☐ Design
- ☒ Testing
- ☐ Maintenance

Clear Response

Activate Windows

Go to Settings to activate Windows
